

## CARINA HEIGHTS CHILD CARE CENTRE

<b>PROJECT TYPE</b>	<b>CHILD CARE CENTRE</b>
<b>SITE + LOCATION</b>	1190 Creek Road, Carina Heights
<b>PROJECT STATUS</b>	DA approval
<b>SERVICES</b>	Town Planning Architecture

The Carina Heights child care center is situated on a steeply sloping site and presented a number of challenges with most of the building required to be suspended above the natural ground. Both the design team and planners collaborated in devising the best outcome for the client.

The design focused on the users interaction with the building and children's unique curiosity about the world around them.

Children are encouraged to interact with the building, learning by seeing, touching and interacting with the elements of the building around them. Through a combination of colour and texture users are provided the perfect environment for learning.
